

Registering Students to a Section in Connect

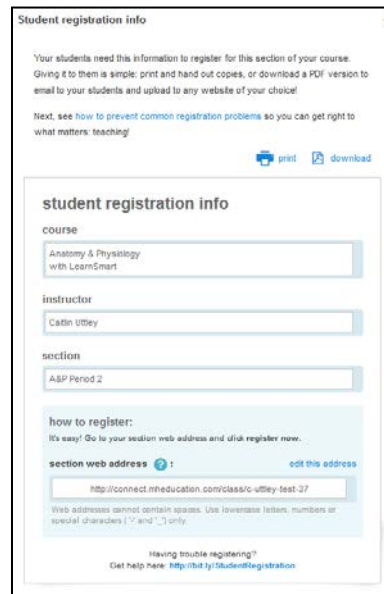

1

In Connect, identify the Course and Section for which you would like to register students. Click on the **Section Options** button next to your Section, and select **Registration Sheet**.

2

Send the **Registration Sheet** to your students. Tell students to visit the **Section Web Address** found on the Registration Sheet to register for the section.

3

Each student will need to have an email address and a Connect **Access Code** to complete his or her registration. Student Access Codes are provided by McGraw-Hill Online Implementation at the time Connect is purchased for your school or school district.

Have an access code?
